PROFESSIONAL SUMMARY

Data Analyst with experience analyzing operational, revenue, and high-volume structured datasets to identify trends, track performance, and support business decision-making. Skilled in Python, SQL, Power BI, Tableau, and Microsoft Excel, with hands-on experience in exploratory data analysis, data cleaning, validation, dashboard development, revenue analysis, KPI tracking, and management reporting. Experienced in translating complex data into actionable business insights for operational and strategic planning.

TECHNICAL SKILLS & CERTIFICATIONS

Analytics & Programming: Python, SQL, Pandas, NumPy, EDA, Data Cleaning, Data Validation, Revenue Analysis
Visualization & Tools: Power BI, Tableau, Microsoft Excel, MySQL, Git, GitHub, KPI Tracking, Dashboard Development

Certifications: Deloitte Data Analytics, HackerRank SQL, Kaggle Intro to Machine Learning, IBM AI Fundamentals

EXPERIENCE

Data Analyst — Togle Labs July 2026 – Present

- Analyze operational and revenue data for custom software solutions supporting services at **Global Village UAE**, including shopping trolleys, balloons, and rickshaw operations.
- Design **Power BI dashboards and software prototypes** providing management with visibility into service performance, operational KPIs, revenue trends, and profitability.
- Perform revenue analysis using historical business data to evaluate performance trends, revenue escalations, and profit margins, supporting **annual tender planning and future revenue projections**.
- Translate operational and financial datasets into actionable business insights and management reporting to support tender evaluation, revenue planning, and strategic decision-making.

Keywords Studios July 2025 – July 2026

Technical Research Associate – AI November 2025 – July 2026

Research Associate – AI July 2025 – November 2025

- Promoted to Technical Research Associate after starting as a Research Associate, taking on expanded responsibility for structured data evaluation and quality analysis.
- Analyzed high-volume AI-generated datasets to identify **accuracy, consistency, quality trends, recurring errors, and edge cases** using structured evaluation criteria.
- Conducted pattern and root-cause analysis on recurring issues, translating findings into structured, data-backed feedback for quality improvement.
- Built, validated, and reviewed structured datasets while tracking **quality metrics and benchmarks** to support continuous data evaluation and model-quality workflows.

EDUCATION & COURSES

Presidency University, Bengaluru Aug 2020 – Jun 2024

B.Tech – Computer Science and Engineering (AI & ML)

QSpiders, Bengaluru Oct 2024 – May 2025

Python Full Stack Development Bootcamp — 8-Month Training Program

PROJECTS

E-Commerce Sales Analytics July 2026

- Analyzed **541K+ e-commerce transactions** using Python, Pandas, and NumPy, performing data cleaning, missing-value analysis, duplicate removal, and transaction validation.
- Engineered revenue and time-based features and conducted exploratory analysis across **3,900+ products, 4,300+ customers, and 38 countries** to evaluate product, customer, geographic, and sales trends.
- Analyzed **£10.25M+ in revenue** to identify top-performing products, geographic patterns, customer behavior, and monthly sales trends, translating findings into business-focused insights.

Deloitte Australia – Data Analytics Job Simulation 2026

- Analyzed machine telemetry data from four factories using **Tableau**, creating calculated fields and an interactive dashboard to identify factory- and machine-level downtime trends.
- Used **Microsoft Excel** to analyze and classify employee compensation equality scores based on defined fairness thresholds.

Event Management & Ticketing Analytics 2024

- Analyzed event and ticketing data using **Power BI** and built interactive dashboards with KPIs, filters, charts, and drill-down views to identify sales trends, event performance, and customer behavior.
